Software engineer with 3 years of experience developing web applications using **Angular 10**, **.NET**, **C#** and **SQL Server** for local clients. Always focusing on best practices and high software performance. I consider myself passionate about programming and learning new technologies, always looking for new challenges. Seeking a software company to apply my knowledge to develop high quality software.

EXPERIENCE

SimTLiX, Fullstack Developer (Córdoba Argentina) — June, 2021 - Present

- Reduced the probability of software bugs by developing Unit/Integration tests and getting a 95% code coverage.
- Designed and developed the UI of online banking processes making a user-friendly system obtaining a high satisfaction level.

Tech Stack: Angular 10 - .NET Core - SQL Server.

Kolektor, Fullstack Developer (Córdoba Argentina) — October, 2019 - September, 2020

- Improved software performance by 40 % by tracking and fixing bugs that were highly increasing the response time of API's services.

Tech Stack: Angular 8 - .NET Framework.

PROJECTS

Rescue-app (Government of Cordoba, Argentina) – 2020

- Web application that allows users to request assistance from different entities and provides a real time chat with the assistant. It helped more than 100 users who called for help and received assistance with an average time of entity's response of 8 seconds.

Tech Stack: in Angular 8, Java (SOAP-REST) and SQL Server.

SKILLS
